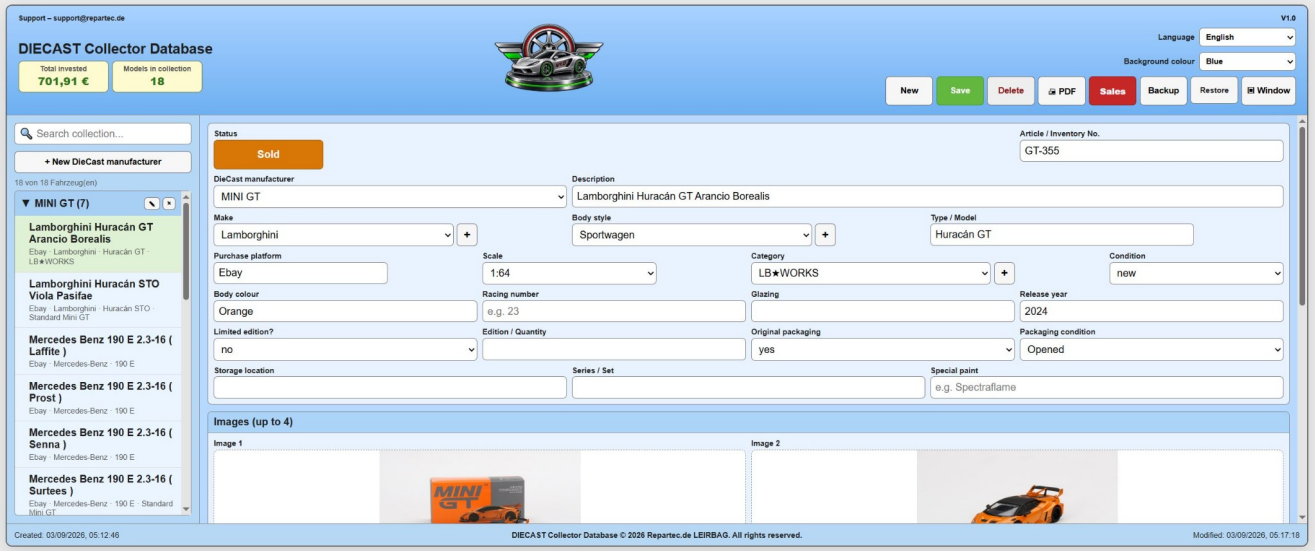
DIECAST Sammler DB
Visual User Manual

Guide to the menus, buttons and main fields of DIECAST Collector Database - V1.0

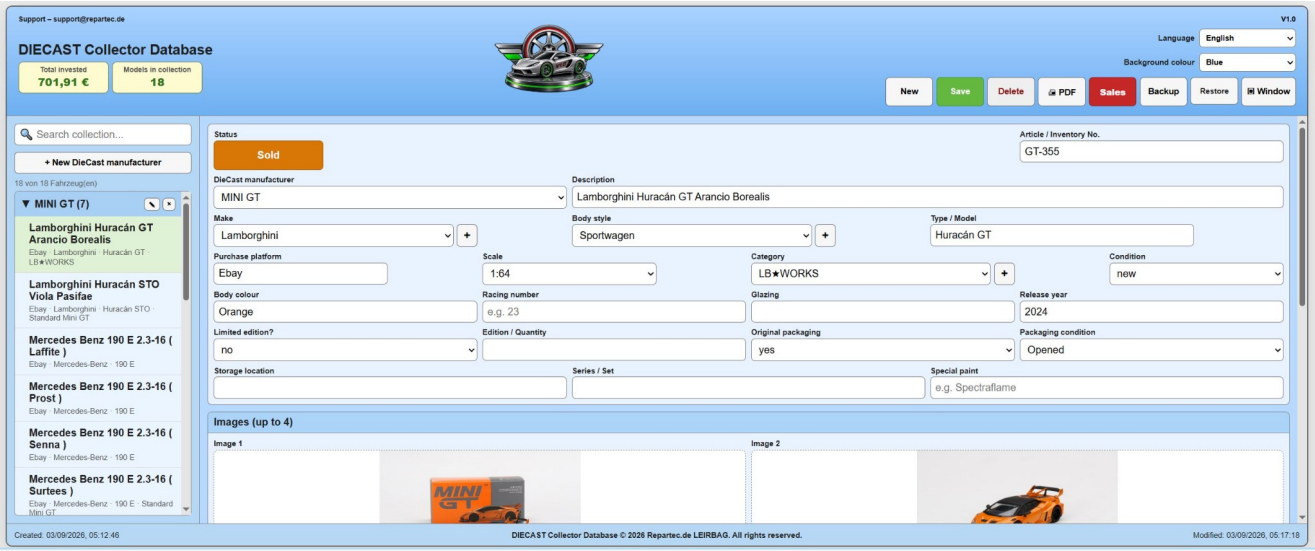


REPARTEC SOFTWARE SOLUTIONS

More than software. It's a passion.

1. Main screen

The main screen brings together the collection, the selected model data and the general commands. The left column is used to search and browse manufacturers/models; the central area contains the complete model record.



Tip: Select a model in the left list first. Its information will appear in the central record.

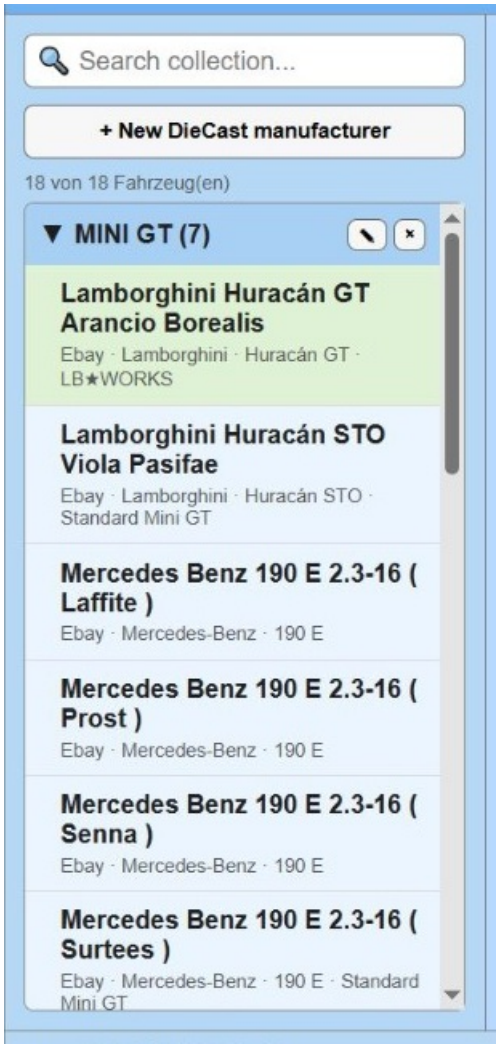
2. Top bar and main buttons

The top bar contains the general commands of the program.

Button / option	Function
Language	Changes the interface language.
Background colour	Changes the interface background colour.
New	Starts a new record for a model.
Save	Saves the entered data or changes.
Delete	Removes the selected model from the collection.
PDF	Opens the PDF / Print report menu.
Sales	Opens sales history, totals and profit.
Backup	Creates a backup of the collection data.
Restore	Restores data from an existing backup.
Window	Controls the program window/display.

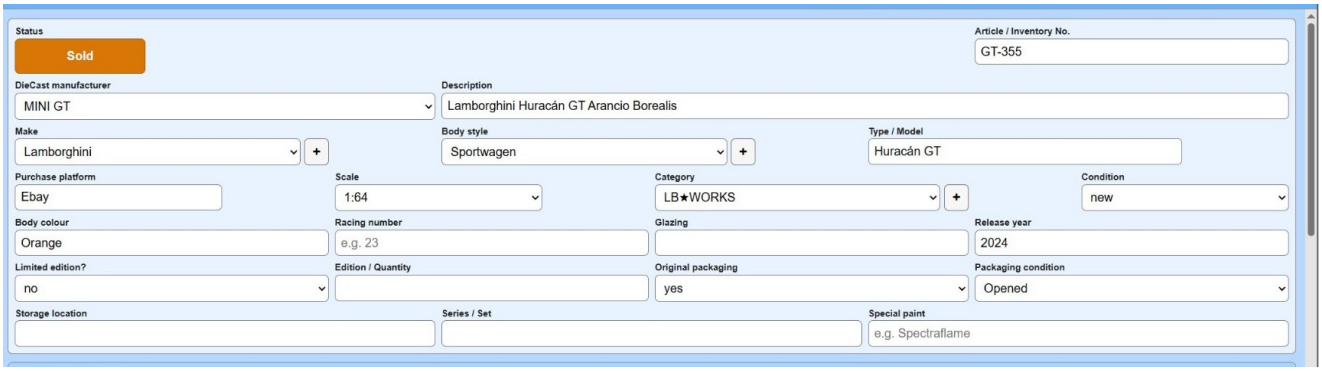
3. Search, manufacturers and collection list

Use the left panel to search the collection, create DieCast manufacturers and select existing models.



4. Model record

The central record stores the characteristics of each model. Not every field has to be filled in; use the information that is relevant to your collection.



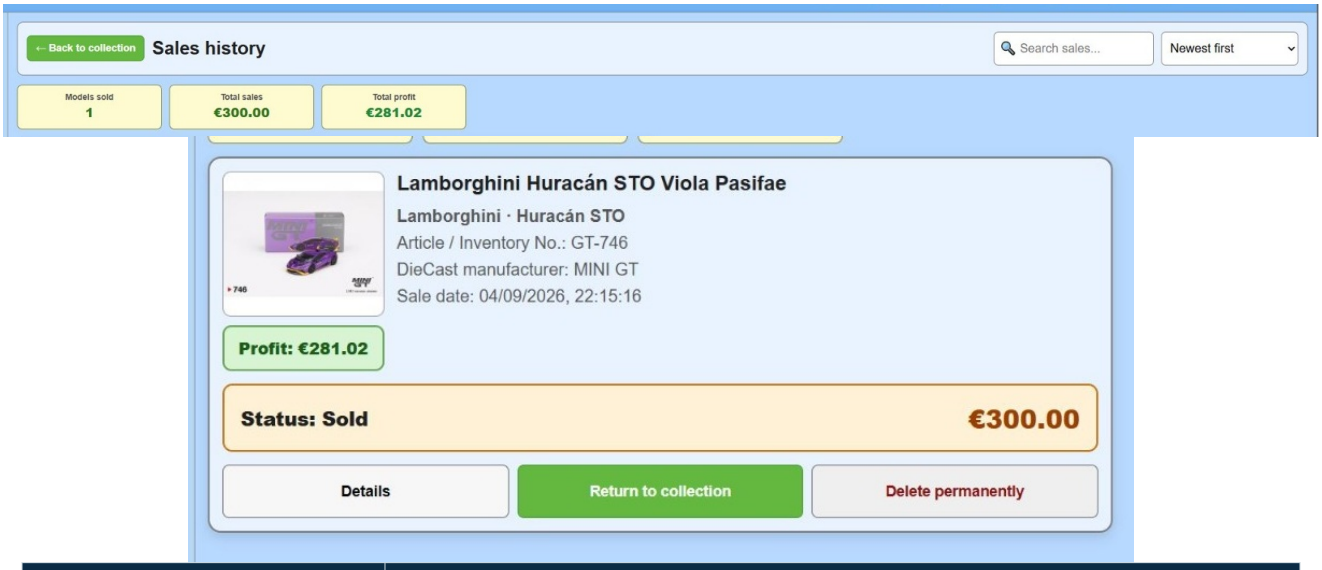
Status - DieCast manufacturer - Article / Inventory No. - Description - Make - Body style - Type / Model - Purchase platform - Scale - Category - Condition - Body colour - Racing number - Glazing - Release year - Limited edition - Edition / Quantity - Original packaging - Packaging condition - Storage location - Series / Set - Special paint.

5. Model photographs

Each model can store **up to 4 photographs**. Use Image 1 to Image 4 to associate pictures with the selected model.

6. Sales history

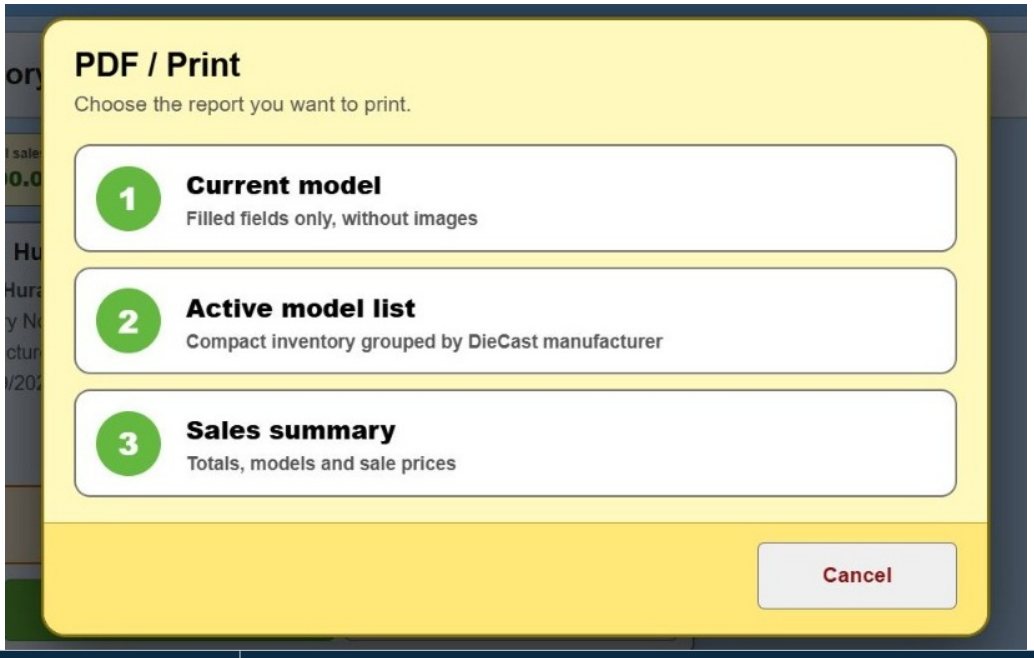
The **Sales** button opens the sales history. The top area shows models sold, total sales and total profit.



Command	Function
Back to collection	Returns to the active collection.
Details	Opens the details of the sold model.
Return to collection	Moves the sold model back into the active collection.
Delete permanently	Permanently deletes the sold record. Use with care.

7. PDF / Print

Clicking **PDF** opens the report menu. Select the report you want to create.



Option	Content
1 - Current model	Report for the currently selected model. It contains filled fields only and no images.
2 - Active model list	Compact active inventory list grouped by DieCast manufacturer.
3 - Sales summary	Sales summary including totals, models and sale prices.
Cancel	Closes PDF / Print without creating a report.

8. Recommended workflow for adding a model

A simple workflow for adding a new item to the collection.

1. If necessary, first create the manufacturer with **+ New DieCast manufacturer**.

2. Click **New**.

3. Fill in the relevant model information.

4. Add up to 4 photographs.

5. Click **Save**.

6. Check that the model appears under the correct manufacturer.

7. Use PDF for reports, Sales for sold items and Backup to protect your data.
